About us

Sprinter 2000 S.A. is a Romanian company founded in 1994 in Braşov, which initially established itself in the field of distribution of important brands of batteries and rechargeable batteries: VARTA, SAFT, STECO.

Starting with 2000, we expended the portfolio of products and distributed brands to include other well-known brands such us: HOPPECKE, PELI, WOLF, OSRAM, GENERAL ELECTRIC, AEG as well as our own private labels FOTON and ESCAPE.

Since 1999 Sprinter 2000 S.A. has diversified its distribution and trade activity and developed the production of two-way radio batteries and customized assemblies of batteries, which are included in various products for civilian and military applications. Sprinter 2000 S.A. offers consulting services on choosing the optimal technical solution, sale, installation, after sales service, testing and monitoring for power supply equipment.

Products

- Batteries and accessories for two-way radio stations;
- Batteries and battery assemblies;
- Back-up and traction batteries;
- Rectifiers, UPSs and generators;
- Portable lighting, flashlights and handlamps;
- Protector cases;
- Gun care sprays and tools.

Services

- Laser cutting;
- Battery Capacity testing;
- 3D printing.

Two-way radio stations batteries and accessories

Batteries for military applications

Romanian brand

Range of products

- Batteries
- Antennas
- Headphones
- Chargers

Foton is our own brand and we only use high quality battery cells from:

The batteries are compatible with most two-way radio station brands (Motorola, Kenwood, ICOM, Nokia, etc)

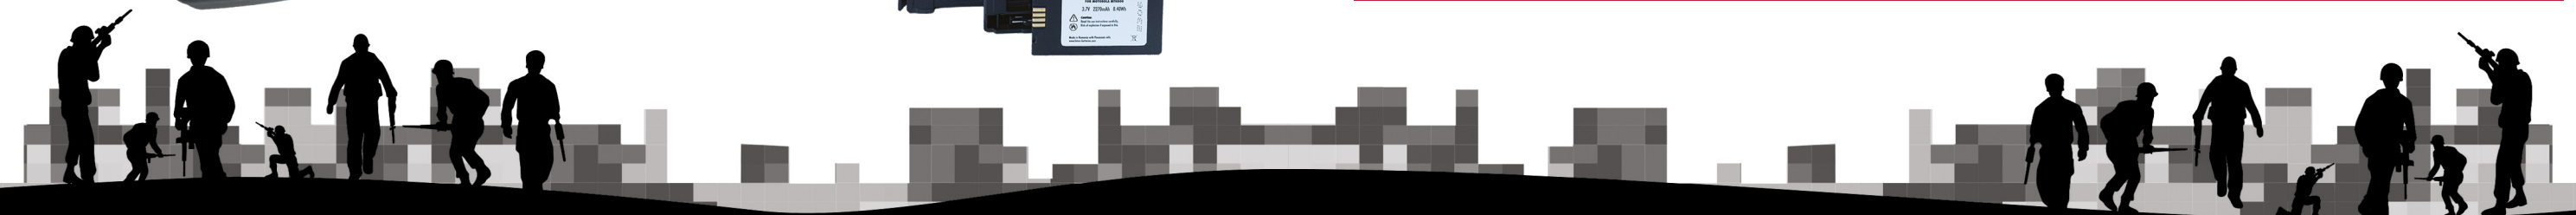

SAFT is a manufacturer of high technology primary and rechargeable batteries used in defence applications. Saft military battery packs are built to withstand demanding mechanical and electrical conditions during training and combat exercises.

SAFT batteries are lightweight and compact and provide exceptional reliability and performance for military applications, ranging from infantry communications to torpedoes, aerial and naval drones, ships, aircrafts and military vehicles.

The high-energy systems provide a combination of power and energy for military applications that require high speed charging and discharging. The high-power systems are designed for military battery applications that require longer run times combined with high power levels. The very high-power systems are offered for applications that require either high discharge power, low temperature power or good regeneration capability.

---	---	---

Primary and rechargeable batteries

Automotive batteries

Rechargeable batteries and battery assemblies used in civil and military operations

Applications:

- Breathalysers and printers;
- Communication systems;
- Thermal cameras (e.g.: Nestor, MARS, CORAL-Z).

Types:

- Ni-Cd;
- Ni-MH;
- Li-Ion / Li-Polymer.

Batteries and battery assemblies

We sell a wide range of batteries and custom-made assemblies. We can also inject plastic casings for batteries and accumulators.

Applications:

- Aiming systems;
- Thermal cameras;
- Communication systems;
- General use.

Types:

- alkaline;
- Lithium (1.5V, 3V, 3.6V).

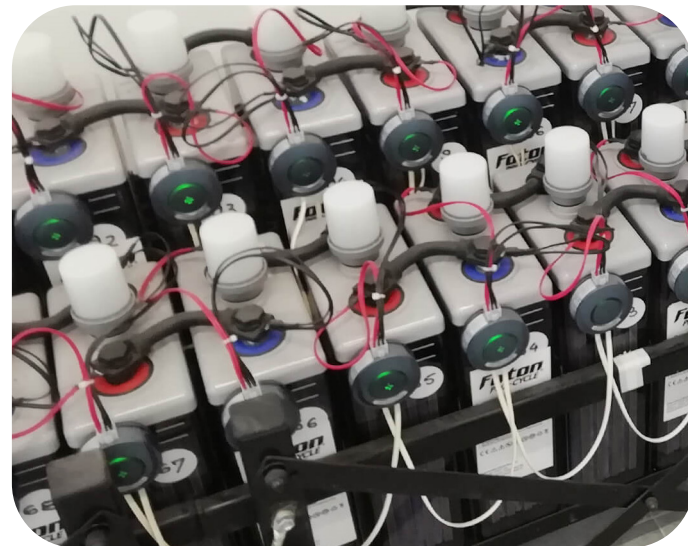

During land operations, vehicle reliability and performance are vital to mission success and safety. In this context, car batteries represent an important component. We offer a full range of:

- Car batteries;
- Motorcycle batteries;
- Lorry/truck batteries;
- Boat batteries.

Energy Storage Systems

Rectifiers, UPSs and generators

Energy storage systems (ESS)

ESSs are an essential component of the global transition to a more sustainable and efficient energy system. Their proper use can significantly contribute to reducing carbon emissions, increasing the reliability of energy systems and optimizing the use of energy resources.

Specifications:

- Can be mounted in a rack;
- Voltage 51.2V;
- Energy 5kWh;
- Modules can be installed in parallel or series.

The advantages of using LiFePO₄ batteries

Pb		LiFePO ₄
70%	Energetic efficiency	98%
30 Wh/kg	Energy density	110 Wh/kg
80%	Depth of discharge	100%
500	Number of cycles	3000
+40°C	Maximum working temperature	+65°C
600W	Power	1200W

Storage systems

- Chemistry: Lead-acid, Ni-Cd, Ni-MH, Li-Ion.
- Technologies: ventilated and sealed elements.
- Voltages:
 - Pb-Acid: 2V, 6V, 12V;
 - Ni-Cd, Ni-MH: 1.2V;
 - Li-ion: 26.9V; 51.2V.

Applications:

- Backup power supply, substations, industrial production sites, telecommunications sites, public buildings;
- UPS supply;
- Storage for renewable energy sites (solar/wind);
- Safety systems in transportation;
- Electrically operated vehicles and machinery.

Rectifiers for converting AC into DC, charging batteries and supplying DC to equipment.

Inverters for converting DC into AC and powering equipment of different powers.

Generators to ensure the supply of electricity through combustion engines.

- Power range: 10 kVA ... 2500 kVA.

UPSs for ensuring the continuity of the AC supply:

- Modular, on-line, double conversion;
- Tower type, on-line, double conversion;
- Rack-able, interactive lines or on-line with double conversion;
- Power range: 1.5 kVA ... 1.500 kVA.

Power supply for camping sites or construction sites without unlimited AC or use in "buffer" mode for applications that require continuous, uninterrupted power supply.

Portable lighting, flashlights and handlamps

Protector cases

Peli™ offers a wide range of portable lighting systems and professional torches:

- Remote Area Lighting Systems (RALS);
- Torches and head torches with ATEX certification;
- Submersible torches;
- Tactical flashlights;
- Industrial lights.

Ex * **ANTIEX PELI™** torches and portable lighting systems are intended for use by professionals in environments with potentially explosive gas mixtures. These flashlights are made of shock or solvent resistant materials and also have antistatic properties compliant with ATEX directive (2014/34 / EU).

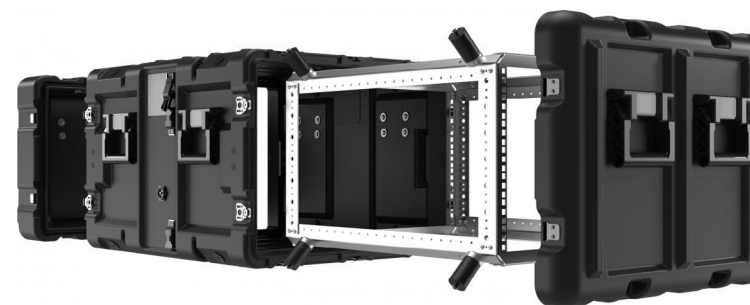

All products are under a list of registered and unregistered trademarks of Peli™ Products, S.L.U., its parent, subsidiaries and/or affiliates.

During operations, you need protector cases to ensure the equipment will work in the most difficult environmental conditions (excessive humidity, extreme temperatures, high pressures, infiltration of dust particles, etc.) or following mechanical shocks, even a severe impact. All cases guarantee superior transport protection for fragile instruments and electronic equipment.

All products are under a list of registered and unregistered trademarks of Peli™ Products, S.L.U., its parent, subsidiaries and/or affiliates.

Gun care sprays

Gun care tools

 Swiss quality
 NATO certified product

Brunox Gun Care

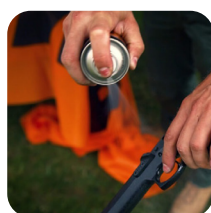

Multi use product, specially developed for gun care: dissolves powder, lead, nickel, tombac & copper residues, the spray is moisture repellent, lubricant and offers corrosion protection.

Cleans

Lubricates

Corrosion protection

BRUNOX® Gun Care can be used on all air, gas, spring, semi-automatic and automatic weapons.

Recommended by:

Brunox LUB&COR®

All-weather lubricant & high-tech corrosion protection for equipment (including guns).

LUB&COR® works brilliantly in extreme conditions: low temperatures, saline or acid environments, high humidity and areas with a lot of dust.

OTIS is an innovative American brand for maintaining firearms offering tools and accessories for gunsmiths. In the picture below, you can see a portable kit for gunsmiths

Keep your gun clean and ready to go with the **RIPCORD®** Series, which contains everything needed for quick maintenance. In the picture below, you can see the 9mm pistol kit.

Video presentation

About us

Fabrica de Scule Râşnov (FSR) is part of the same corporate group with **Sprinter 2000** and **Auto Novex, Ford dealer**. FSR continues the tradition started in 1919 by producing cutting tools for both the domestic and foreign markets. Our experience helps our customers identify the most suitable solutions, from both from a technical and economical perspective.

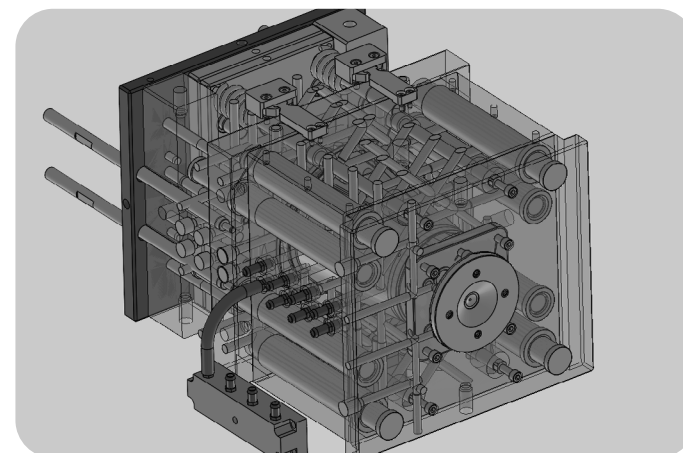

Services

- Mechanical processing;
- Heat treatment;
- Thermochemical treatments;
- Butt welding.

Câmpului street, no. 1, 505400, Râşnov, Braşov county | www.fsr.ro

The range of products executed by FSR includes:

- Special moulds and tools;
- Cutting moulds;
- Plastic injection moulds .

Why buy a Ford?

- Ford is a company that chose to invest in Romania and produces in Craiova 3 high selling models (Puma, Tourneo Courier and Transit Courier);
- Ford's professional service network has national coverage (40 locations);
- **Auto Novex, Ford dealer**, is part of the same corporate group with **Sprinter 2000** and **FSR**. Moreover, we have a dedicated B2G sales team.

Why Ford Ranger*?

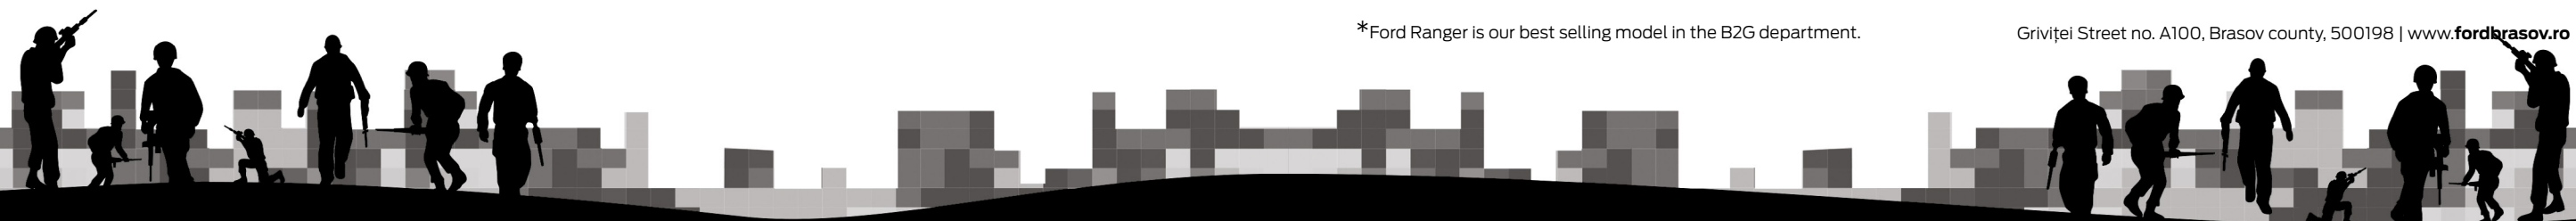

Europe's best-selling pick-up offers a wide range of engines, high load capacity, towing and robust agility on rough terrain. It can be delivered with various equipment:

- Winch;
- Additional lights;
- Additional power sockets ;
- Shelves in cargo area and hardtop;
- Two-way radio stations, emergency lighting.

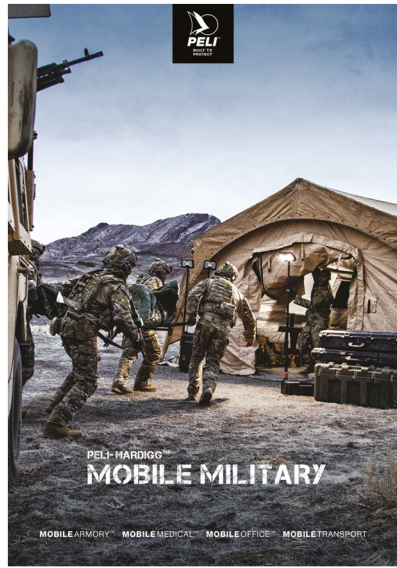

*Ford Ranger is our best selling model in the B2G department.
